

ARFA SADAF

Data Analyst | Data Science | Business Intelligence

Hassan, Karnataka, India | [91 9353367368](tel:919353367368) | sadafarfa147@gmail.com | [GitHub](#) | [LinkedIn](#)

Professional Summary

Entry-level Data Analyst with a B.E. in Artificial Intelligence and Data Science, applying Python, SQL, Power BI, and machine learning across two internships and end-to-end analytics projects. Delivered quantified business insights — including a retail loyalty dashboard tracking Rs.35M+ in revenue and a fraud-detection model (LightGBM) catching 95%+ of fraud cases across 13M+ transactions. Skilled in data cleaning, EDA, statistical analysis, and translating large datasets into KPI-driven dashboards and data-driven recommendations.

Technical Skills

Programming: Python, SQL

Data Analysis: Pandas, NumPy, Data Cleaning, Data Preprocessing, Feature Engineering, Exploratory Data Analysis (EDA), Statistical Analysis

Data Visualization / BI: Power BI, Matplotlib, Seaborn

Databases: MySQL, PostgreSQL, DuckDB

Machine Learning: Scikit-learn, LightGBM, Classification, Predictive Analytics, Model Evaluation

Tools: Jupyter Notebook, Git, GitHub, VS Code, Streamlit

Experience

KodNest Technologies — Data Science Intern

Feb 2026 — Jul 2026

Project: Retail Customer Shopping Behavior & Loyalty Analytics

- Analyzed 3,900 customer records using Python and PostgreSQL, writing SQL queries to extract, filter, and aggregate transactional data for revenue, loyalty, and product-performance analysis.
- Performed data cleaning, preprocessing, and EDA with Pandas and NumPy to segment customers and analyze Rs.35.05M in revenue, uncovering a Rs.8,988 average order value and category/gender revenue splits.
- Built an interactive Power BI dashboard with KPI cards and filters, revealing that 1,800 subscribers (46% of customers) drove 60.9% of total revenue — a key insight for loyalty-program strategy.

TechnoFly — Software Development Intern

Jul 2025 — Aug 2025

- Built 3 full-stack applications (MealBuddy, KodBank, Netflix Clone) using AI-assisted development, integrating APIs, databases, and authentication while debugging and testing features.

Projects

Supply Chain Performance Analysis & Delivery Delay Prediction | *Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*

- Cleaned and analyzed 180,519 supply chain records (172,765 after cleaning) from the DataCo dataset, using EDA to uncover delivery-delay and shipping-mode trends.
- Built a Random Forest model to predict delivery delays, reaching 74% accuracy with 0.79 precision and 0.75 recall on late orders.

Financial Transaction Fraud Detection & Risk Analytics | *Python, DuckDB, SQL, Parquet, Scikit-learn, LightGBM, Streamlit*

- Processed 13.3M+ transactions (8.9M labeled, 0.15% fraud rate) using DuckDB and SQL, then engineered 34 time-based features to capture fraud behavior patterns.
- Built a LightGBM model that outperformed a Logistic Regression baseline, catching 1,296 of 1,360 fraud cases (95.3% recall, 0.7523 PR-AUC), and shared results through a Streamlit dashboard.

DataCortex — AI-Powered Enterprise Analytics Platform | *Python, React, SQL, DuckDB, Node.js, OpenRouter, Recharts*

- Built an AI-powered enterprise analytics platform that converts natural-language business questions into executable SQL and interactive dashboards over a 267K+ record normalized supply chain database.
- Developed a multi-step Text-to-SQL pipeline with schema retrieval, SQL generation, validation, execution, and deterministic business insights for revenue, profit, logistics, and customer analytics.
- Designed a React business intelligence dashboard featuring KPI cards, charts, regional analytics, saved queries, and conversation history with transparent SQL execution.

Education

B.E., Artificial Intelligence and Data Science — CGPA: 7.71

2022 – 2026

Navkis College of Engineering, Hassan

Pre-University Course (PUC) — 70%

2020 – 2022

Masters PU College, Hassan

Secondary School (SSLC) — 82%

2019 – 2020

C K S Girls High School, Hassan

Certifications

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional — Oracle University
- Accenture Data Analytics & Visualization Job Simulation — Forage
